

Inspecta 1010

AI DRIVEN SECURITY.
SMARTER. FASTER. SAFER

RAYTINA
2.0

KEY FEATURS

- 1.Operator Status Monitoring
- 2.Ai Model Integration Platform
- 3.120 HZ High Refresh Rate Display
- 4.Variable Conveyer Speed
- 5.Network Connectivity
- 6.Event Traceback Functionality
- 7.Multi Method Quick Login
- 8.Audible & Visual Alerts
- 9.Comprehensive Data Storage
- 10.Package to Image Correlation
- 11.Video to Image Correlation

The Tuwaiq Inspecta 1010 Intelligent X-ray Inspection System is a high-capacity security screening solution designed for large-size baggage and cargo inspection. Equipped with advanced AI recognition technology, intelligent imaging algorithms, and an open AI integration platform, the system significantly improves detection accuracy and operational efficiency.

It effectively addresses challenges such as operator fatigue, missed detections, and complex object identification during high-throughput screening. With its extra-large tunnel size, the system is ideal for demanding security environments including airports, customs checkpoints, logistics hubs, railway stations, seaports, government facilities, embassies, large-scale events, and industrial inspection scenarios.

Specifically engineered for the inspection of oversized luggage, parcels, cargo boxes, and bulk goods, the Tuwaiq Inspecta 1010 enhances both inspection intelligence and security reliability.

Intelligent Imaging & Inspection Features

Next-Generation HD Imaging Algorithm

Powered by advanced image processing technology, delivering ultra-clear, high-contrast X-ray images for precise inspection of dense and complex objects.

Advanced Material Discrimination

Utilizes multi-energy analysis to identify atomic composition, displaying materials in multi-color modes (3 or 6 colors) for improved differentiation of organic, inorganic, and mixed substances.

AI Intelligent Recognition

Integrated with deep learning algorithms for automatic detection of prohibited items, dangerous goods, and abnormal structures, reducing reliance on operator experience.

STANDARD FEATURES:

- **Dimensions Size**

Tunnel Size: 1000 mm (W) × 1000 mm (H)
Machine Dimension: Approx. 3500 mm (L) × 1500 mm (W) × 1900 mm (H)
Operation Desk: 1000 mm (L) × 750 mm (W) × 1200 mm (H)

- **Performance**

Line Resolution: 38 AWG standard, 40 AWG typical
Penetration (Steel): 32 mm standard, 36 mm typical

- **X - ray Generator**

X - ray Generators: 1
Anode Voltage / Current: 160kV / 1.0mA (Adjustable)
Cooling / Working Cycle: Oil Cooling / Continuous Operation
Beam Direction: Vertically Upward

- **Radiation Safety**

External Dose Rate: < 1.0 µSv/h (100 mm from surface)
Film Safety: Meets ASA / ISO1600 standard

- **Conveyor System**

Conveyor Height: 300 mm
Speed: 0.2 / 0.3 / 0.4 m/s adjustable
Max Load: 200 Kg
Continuous Operation: 24/7 industrial - grade design

- **Display**

Display: 120Hz High Refresh
Screen Size: 22" Industrial Monitor
Resolution: 1920 × 1080 @ 120Hz

- **Intelligent Functions**

Prohibited Item Library: 35 categories / 60+ item types
Login Modes: Face / Fingerprint / Password

- **System Functions**

Includes time/date display, baggage counting, user authority management, log management, system diagnostics, self - test, standby mode, training mode, dual - direction scanning, organic/inorganic alarms, explosive detection, and more.

- **Image Processing Functions**

Multi - mode display (Color / B&W), Organic / Inorganic stripping, High / Low penetration enhancement, Edge enhancement & super enhancement, Suspect material highlighting (Z - effective), 64× zoom & image magnifier.

- **Network & System Integration**

Supports centralized data management, remote monitoring, and integration with security platforms (HCP / RMS systems).

- **Audible & Visual Alarm System**

Instant alerts for detection of suspicious or prohibited items to improve response speed.

Note: The product images shown are for illustration only. Actual design may vary slightly depending on manufacturing updates.
